DETAILED ACTION

Claims 1-48, 50-56 and 58-115 are pending in the application.

This action is in response to applicant's amendment filed June 19, 2002. Claims 1, 9, 25-33, 46, 54, 66, 74, 86-89, 92, 93, 96 and 104 have been amended and claims 49 and 57 have been canceled.

Response to Amendment

Applicant's arguments filed June 19, 2002 have been fully considered with the following effect:

1. The original patent, or an affidavit or declaration as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.
2. The applicants' amendment and arguments are sufficient to overcome the 35 U.S.C. § 112, first paragraph rejection of the last office action which is hereby **withdrawn**.
3. The applicants' amendment and arguments are sufficient to overcome the 35 U.S.C. § 112, second paragraph rejections of the last office action which are hereby **withdrawn**.
4. The applicants' amendment and arguments are sufficient to overcome the 35 U.S.C. § 102, anticipation rejection of the last office action which is hereby **withdrawn**.

Art Unit: 1624

5. With regards to the 35 U.S.C. § 103, obviousness rejection of claims 1-6, 10-13, 30, 35, 44 and 45, the applicants' arguments have been fully considered but are not found persuasive. The applicants' stated that the claimed invention specifically excludes the compounds of Stokbroekx by reciting the following proviso in independent claims 1 and 30: "with the exclusion of compounds wherein X is O or S, Y is hydrogen, and R is hydrogen, C₁₋₄ alkyl, chlorine, fluorine, bromine, iodine, cyano, C₁₋₄ alkoxy, *aryl*, or -COOR₂₃ where R₂₃ is C₁₋₄ alkyl". The proviso at the end of claims 1 and 30 is actually with the exclusion of compounds wherein X is O or S, Y is hydrogen, and R is hydrogen, C₁₋₄ alkyl, chlorine, fluorine, bromine, iodine, cyano, C₁₋₄ alkoxy, or -COOR₂₃ where R₂₃ is C₁₋₄ alkyl, however, this does not exclude the compounds where R is carboxyl. The definition of R³ in EP 0 398 425 includes -COOR⁴ where R⁴ is hydrogen.

Claims 1-6, 10-13, 30, 35, 44 and 45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stokbroekx et al., EP 0 398 425. For reasons of record and stated above.

6. The applicants' amendment and arguments are sufficient to overcome the 35 U.S.C. § 103, obviousness rejection of claims 1-4, 6, 9-13, 25, 27, 30, 33-35, 38-39 and 42-45 over Smith et al., U.S. Patent No. 4,590,196, in the last office action which is hereby **withdrawn**.

In view of the amendment dated June 19, 2002, the following new grounds of rejection apply:

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1624

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-13, 25, 27, 29-48, 50-56, 58-95 and 104-108 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reasons apply:

- a) Claims 1 (and claims dependent thereon) are missing the double bonds in the phenyl ring which appears in claim 1 of U.S. 5,658,911. Instead of the circle which appears in the amendment.

§ 1.121 Manner of making amendments.

(a) Erasures, additions, insertions, or alterations of the Office file of papers and records must not be physically entered by the applicant. Amendments to the application (excluding the claims) are made by filing a paper (which should conform to § 1.52) directing or requesting that specified amendments be made. The exact word or words to be stricken out or inserted by said amendment must be specified and the precise point indicated where the deletion or insertion is to be made.

(b) Except as otherwise provided herein, a particular claim may be amended only by directions to cancel or by rewriting such claim with underlining below the word or words added and brackets around the word or words deleted. The rewriting of a claim in this form will be construed as directing the cancellation of the original claim; however, the original claim number followed by the parenthetical word "amended" must be used for the rewritten claim. If a previously rewritten claim is rewritten, underlining and bracketing will be applied in reference to the previously rewritten claim with the parenthetical expression "twice amended," "three times amended," etc., following the original claim number.

(c) A particular claim may be amended in the manner indicated for the application in paragraph (a) of this section to the extent of corrections in spelling, punctuation, and typographical errors. Additional amendments in this manner will be admitted provided the changes are limited to (1) deletions and/or (2) the addition of no more than five words in any one claim. Any amendment submitted with instructions to amend particular claims but failing to conform to the provisions of paragraphs (b) and (c) of this section may be considered nonresponsive and treated accordingly.

(d) Where underlining or brackets are intended to appear in the printed patent or are properly part of the claimed material and not intended as symbolic of changes in the particular claim, amendment by rewriting in accordance with paragraph (b) of this section shall be prohibited.

(e) In reissue applications, both the descriptive portion and the claims are to be amended by either (1) submitting a copy of a portion of the description or an entire claim with all matter to be

Art Unit: 1624

deleted from the patent being placed between brackets and all matter to be added to the patent being underlined, or (2) indicating the **exact word** or words to be stricken out or inserted and the precise point where the deletion or insertion is to be made. Any word or words to be inserted must be underlined. See § 1.173.

(f) Proposed amendments presented in patents involved in reexamination proceedings must be presented in the form of a full copy of the text of: (1) Each claim which is amended and (2) each paragraph of the description which is amended. Matter deleted from the patent shall be placed between brackets and matter added shall be underlined. Copies of the printed claims from the patent may be used with any additions being indicated by carets and deleted material being placed between brackets. Claims must not be renumbered and the numbering of the claims added for reexamination must follow the number of the highest numbered patent claim. No amendment may enlarge the scope of the claims of the patent. No new matter may be introduced into the patent.
